Message Templates

[language](#) [message templates](#) [translations](#)

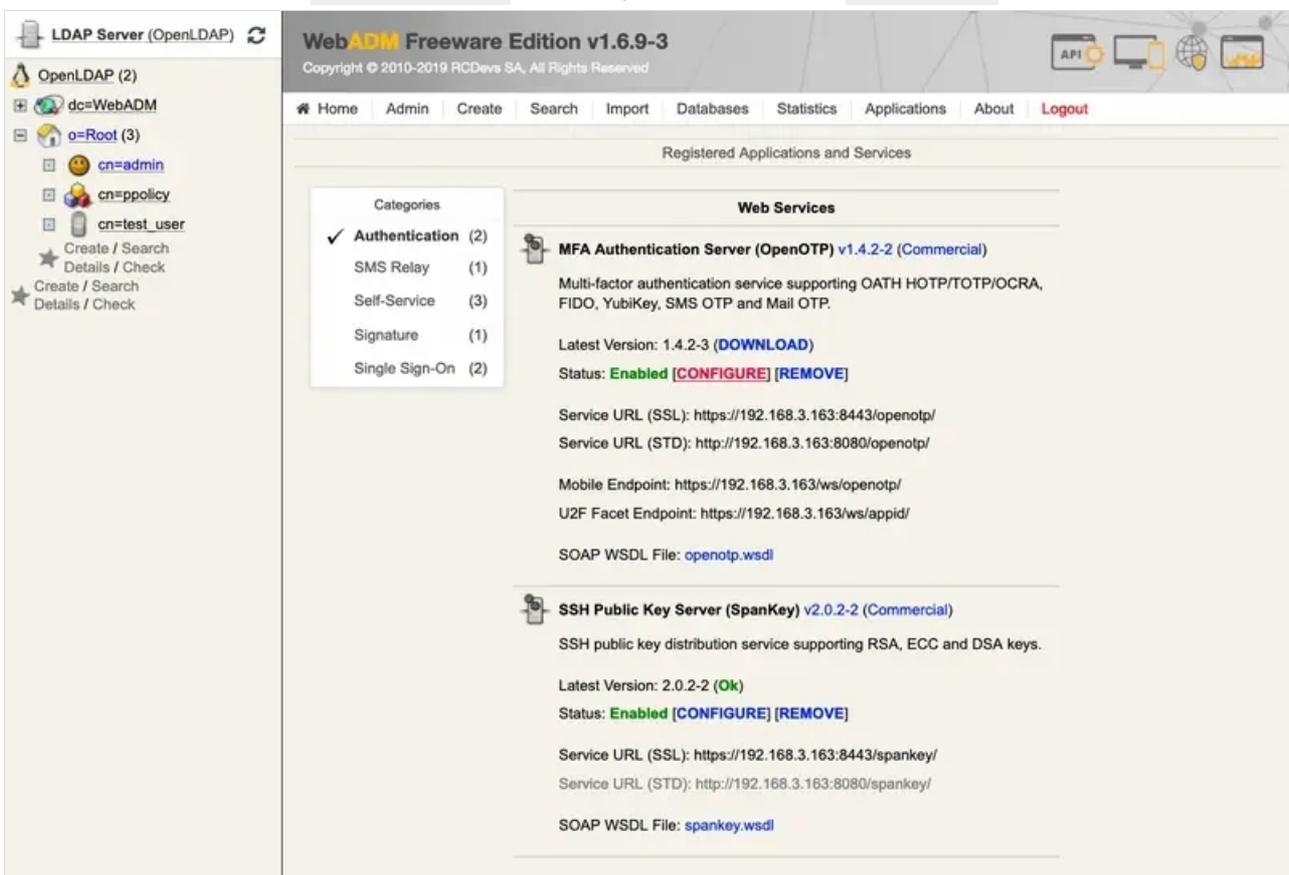

1. Overview

This guide will reveal where to look for the message templates, how-to modify the English message templates and how-to add another language.

2. Message Templates

2.1 OpenOTP

Log into the WebADM GUI, under [Applications](#), choose OpenOTP and click on [CONFIGURE](#).

The screenshot displays the WebADM Freeware Edition v1.6.9-3 GUI. The left sidebar shows the LDAP Server (OpenLDAP) tree with nodes for OpenLDAP (2), dc=WebADM, o=Root (3), cn=admin, cn=ppolicy, and cn=test_user. The main content area is titled "Registered Applications and Services" and lists "Web Services". The "Authentication" category is selected, showing a list of services: MFA Authentication Server (OpenOTP) v1.4.2-2 (Commercial), SSH Public Key Server (SpanKey) v2.0.2-2 (Commercial), SMS Relay (1), Self-Service (3), Signature (1), and Single Sign-On (2). The MFA Authentication Server (OpenOTP) v1.4.2-2 (Commercial) service is expanded, showing details: Multi-factor authentication service supporting OATH HOTP/TOTP/OCRA, FIDO, YubiKey, SMS OTP and Mail OTP. Latest Version: 1.4.2-3 (DOWNLOAD). Status: Enabled [CONFIGURE] [REMOVE]. Service URL (SSL): https://192.168.3.163:8443/openotp/. Service URL (STD): http://192.168.3.163:8080/openotp/. Mobile Endpoint: https://192.168.3.163/ws/openotp/. U2F Facet Endpoint: https://192.168.3.163/ws/appid/. SOAP WSDL File: openotp.wsdl.

Under [MAIL OTP](#), one can change the default [Email Subject](#).

Apply Cancel Reset

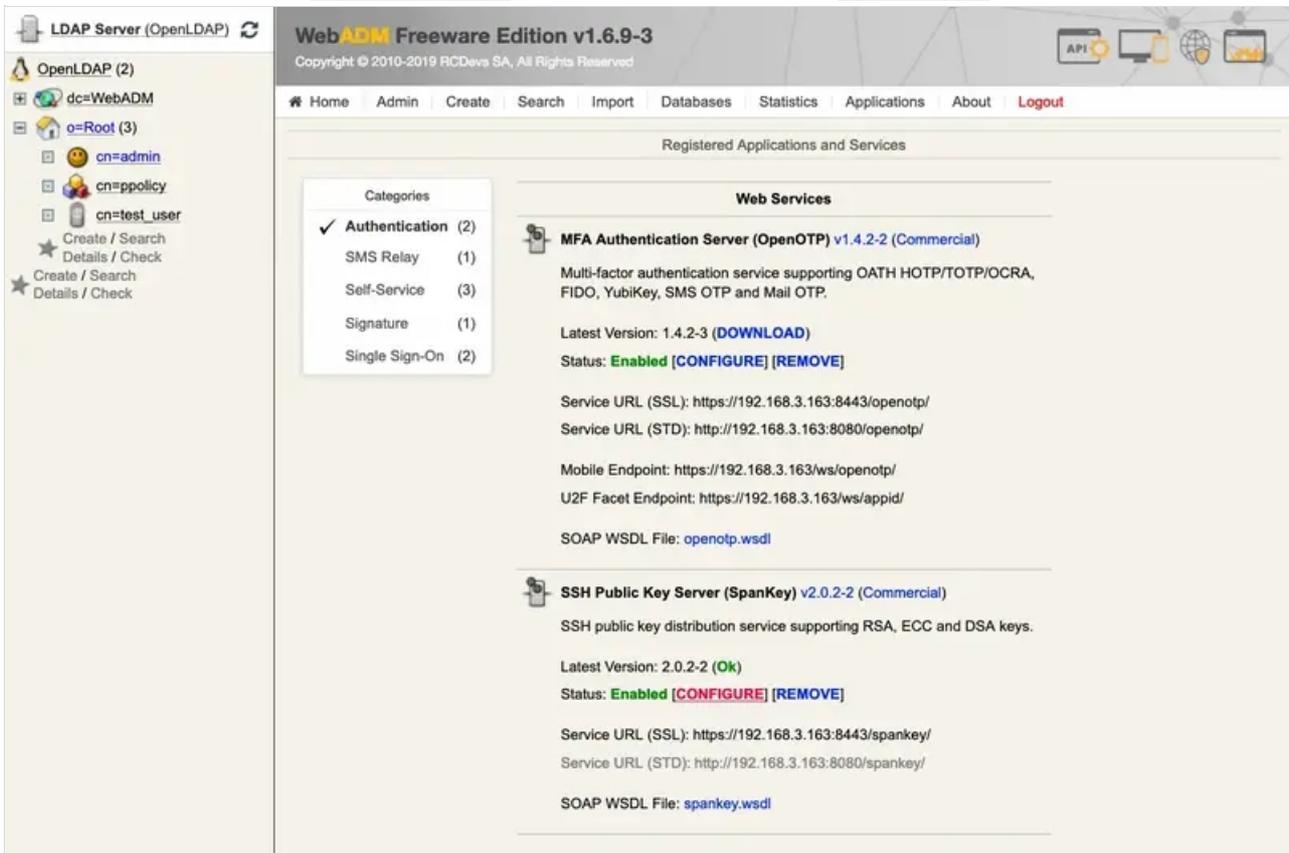

Here the English message templates can be modified. If you want to add or modify another language then click on [Localized](#).

Message templates for other languages can be added here. One can export/import as/from a CSV file. Per default, only the languages “EN”, “FR”, “DE”, “ES”, “IT”, “FI” are available. However, one can add more by adding it to `/opt/webadm/conf/webadm.conf`. Have a look at the chapter [2.7 Localized Messages](#).

2.2 SpanKey

Log into the WebADM GUI, under **Applications**, choose SpanKey and click on **CONFIGURE**.

Under **User Notifications**, one can add the **Notification Email Subject**.

The screenshot shows the 'User Notifications' configuration page in WebADM. The left sidebar displays the LDAP hierarchy: OpenLDAP (2), dc=WebADM, o=Root (3), cn=admin, cn=ppolicy, and cn=test_user. The main content area has a title 'User Notifications' and a navigation menu (Home, Admin, Create, Search, Import, Databases, Statistics, Applications, About, Logout). The configuration options are:

- Send Expire Notification**: A dropdown menu is set to 'MAIL'. Below it, text reads: 'Send a notification email/SMS to the user when his LDAP password or SSH key expired.'
- Notification Email Subject**: A text input field contains 'SSH Access Notification' and a 'Localized' button is to its right.
- Send Self-Registration Links**: Radio buttons for 'Yes' and 'No (default)' are selected.
- Send Password Reset Links**: Radio buttons for 'Yes' and 'No (default)' are selected.

Scroll down to **Message Templates** to find the other message templates for SpanKey.

The screenshot shows the 'Message Templates' configuration page in WebADM. The left sidebar is identical to the previous screenshot. The main content area has a title 'Message Templates' and the same navigation menu. The configuration options are:

- Pubkey Failed Message**: Text input field contains 'Invalid user or user not found' and a 'Localized' button.
- Request Success Message**: Text input field contains 'Operation success' and a 'Localized' button.
- Invalid Request Message**: Text input field contains 'Invalid request' and a 'Localized' button.
- Auth Failed Message**: Text input field contains 'Invalid password' and a 'Localized' button.
- Invalid Account Message**: Text input field contains 'Account missing required data' and a 'Localized' button.
- Missing Server Tag Message**: Text input field contains 'Account missing required server tag' and a 'Localized' button.
- Password Required Message**: Text input field contains 'Enter your LDAP password' and a 'Localized' button.
- Password Expired Message**: Text input field contains 'Your LDAP password expired or must be changed' and a 'Localized' button.
- Pubkey Expired Message**: Text input field contains 'SSH public key expired' and a 'Localized' button.
- Timer Exists Message**: Text input field contains 'Blocking timer pending' and a 'Localized' button.
- No Session Message**: Text input field contains 'Session not started or timedout' and a 'Localized' button.
- Server Error Message**: Text input field contains 'Server error' and a 'Localized' button.
- Server Busy Message**: Text input field contains 'Client access denied or server busy. Retry later' and a 'Localized' button.

At the bottom of the page, there are three buttons: 'Apply' (highlighted in blue), 'Cancel', and 'Reset'.

Here the English message templates can be modified. If you want to add or modify another language then click on **Localized**.

The screenshot shows the WebADM Freeware Edition v1.6.9-3 interface. The left sidebar displays the LDAP Server (OpenLDAP) configuration, including the OpenLDAP (2) tree with nodes for dc=WebADM, o=Root (3), and various users like cn=admin, cn=ppolicy, and cn=test_user. The main content area is titled 'Database Viewer for Localized Messages (2 results out of 69 localized messages)'. It features a 'Message Selection' section with filters for Application (SpanKey), Reference (RequestFailedMessage), and Language (ALL). The 'Message Actions' section includes options for Update selected messages, Delete selected messages, Import from CSV file, and Export as CSV / XML. Below these is a table of localized messages:

Application	Reference	Language	Message
SpanKey	RequestFailedMessage	DE	Ungültiger Benutzer oder Benutzer nicht gefunden
SpanKey	RequestFailedMessage	FR	Utilisateur non valide ou utilisateur introuvable

Below the table is a 'New Messages' section with a form to add new localized messages for different languages (ES, IT, FI, LU). At the bottom, there are buttons for 'Update Selected Messages' and 'Back to SpanKey'.

Message templates for other languages can be added here. One can export/import as/from a CSV file. Per default, only the languages “EN”, “FR”, “DE”, “ES”, “IT”, “FI” are available. However, one can add more by adding it to `/opt/webadm/conf/webadm.conf`. Have a look at the chapter [2.7 Localized Messages](#).

2.3 Secure Password Reset (PwReset)

Log into the WebADM GUI, under **Applications**, choose Secure Password Reset (PwReset) and click on **CONFIGURE**.

LDAP Server (OpenLDAP)

- Create / Search Details / Check

Under **Email & SMS Settings**, one can change the **Email Subject**. Under **Message Templates** to find the other message templates for Secure Password Reset (PwReset). Here, the English message templates can be modified.

For example, to translate or modify the sentence `Server error`, edit the following file

`/opt/webadm/webapps/pwreset/lang/common.json` like below.

```
-bash-4.2# vi /opt/webadm/webapps/pwreset/lang/common.json
{
  "OpenOTP is not installed or configured": {
    "FR": "OpenOTP n'est pas installé ou configuré",
    "DE": "OpenOTP ist nicht installiert oder konfiguriert"
  },
  "Server error": {
    "FR": "Erreur du serveur",
    "DE": "Serverfehler"
  },
  ...
```

Add a new language, for example `DE`, then modify `languages="FR,DE"` to the following file

`/opt/webadm/webapps/pwreset/pwreset.xml` just like below.

```
-bash-4.2# vi /opt/webadm/webapps/pwreset/pwreset.xml
<?xml version="1.0" encoding="UTF-8" ?>

<!-- YOU SHOULD NOT NEED TO MODIFY THIS FILE -->

<WebApp name="PwReset"
  icon="pwreset.png"
  version="1.0.12-1"
  wapi="51" eapi="2"
  admcss="style.css"
  section="Self-Service"
  license="freeware"
  languages="FR,DE"
  desc="Secure Password Reset"
  help="Use this Web application to securely reset your LDAP or Domain password when it is lost or
expired.">
  ...
```

2.4 User Self-Service Desk (SelfDesk)

If you want to add or modify another language then have a look at the following folder

`/opt/webadm/webapps/selfdesk/lang/`.

```
-bash-4.2# ls -lha /opt/webadm/webapps/selfdesk/lang/
total 280K
drwxr-xr-x 2 root root 4.0K Feb 26 17:57 .
drwxr-xr-x 5 root root 148 Feb 26 17:56 ..
```

```
-rw-r--r-- 1 root root 1.1K Feb 22 12:55 appkeys.json
-rw-r--r-- 1 root root 2.0K Feb 22 12:55 appkeys_register.json
-rw-r--r-- 1 root root 1004 Feb 22 12:55 appkeys_unregister.json
-rw-r--r-- 1 root root 16K Feb 22 12:55 common.json
-rw-r--r-- 1 root root 517 Feb 22 12:55 drop_emergency.json
-rw-r--r-- 1 root root 20 Feb 22 12:55 drop_otplist.json
-rw-r--r-- 1 root root 419 Feb 22 12:55 drop_prefix.json
-rw-r--r-- 1 root root 394 Feb 22 12:55 edit_emergency.json
-rw-r--r-- 1 root root 448 Feb 22 12:55 edit_mailmode.json
-rw-r--r-- 1 root root 455 Feb 22 12:55 edit_otpfallback.json
-rw-r--r-- 1 root root 444 Feb 22 12:55 edit_otplength.json
-rw-r--r-- 1 root root 502 Feb 22 12:55 edit_otptimeout.json
-rw-r--r-- 1 root root 419 Feb 22 12:55 edit_otptype.json
-rw-r--r-- 1 root root 2.2K Feb 22 12:55 edit_password.json
-rw-r--r-- 1 root root 1.6K Feb 22 12:55 edit_pincode.json
-rw-r--r-- 1 root root 1020 Feb 22 12:55 edit_prefix.json
-rw-r--r-- 1 root root 369 Feb 22 12:55 edit_pushlogin.json
-rw-r--r-- 1 root root 361 Feb 22 12:55 edit_securemail.json
-rw-r--r-- 1 root root 397 Feb 22 12:55 edit_simplereg.json
-rw-r--r-- 1 root root 436 Feb 22 12:55 edit_smsmode.json
-rw-r--r-- 1 root root 423 Feb 22 12:55 edit_smstype.json
-rw-r--r-- 1 root root 340 Feb 22 12:55 edit_ssoenabled.json
-rw-r--r-- 1 root root 463 Feb 22 12:55 edit_ssotimeout.json
-rw-r--r-- 1 root root 840 Feb 22 12:55 edit_userinfos.json
-rw-r--r-- 1 root root 1.4K Feb 22 12:55 index.json
-rw-r--r-- 1 root root 1.5K Feb 22 12:55 login_pki.json
-rw-r--r-- 1 root root 2.2K Feb 22 12:55 login_uid.json
-rw-r--r-- 1 root root 20 Feb 22 12:55 logout.json
-rw-r--r-- 1 root root 1.4K Feb 22 12:55 openid.json
-rw-r--r-- 1 root root 7.1K Feb 22 12:55 openotp.json
-rw-r--r-- 1 root root 1.4K Feb 22 12:55 openotp_disable.json
-rw-r--r-- 1 root root 2.4K Feb 22 12:55 openotp_download.json
-rw-r--r-- 1 root root 20 Feb 22 12:55 openotp_listdrop.json
-rw-r--r-- 1 root root 1.2K Feb 22 12:55 openotp_listinit.json
-rw-r--r-- 1 root root 399 Feb 22 12:55 openotp_listview.json
-rw-r--r-- 1 root root 674 Feb 22 12:55 openotp_logintest.json
-rw-r--r-- 1 root root 13K Feb 22 12:55 openotp_register.json
-rw-r--r-- 1 root root 5.4K Feb 22 12:55 openotp_resync.json
-rw-r--r-- 1 root root 453 Feb 22 12:55 openotp_unblock.json
-rw-r--r-- 1 root root 139 Feb 22 12:55 openotp_unregister.json
-rw-r--r-- 1 root root 1.4K Feb 22 12:55 openu2f.json
-rw-r--r-- 1 root root 1.3K Feb 22 12:55 openu2f_logintest.json
-rw-r--r-- 1 root root 3.4K Feb 22 12:55 openu2f_register.json
-rw-r--r-- 1 root root 696 Feb 22 12:55 openu2f_removeall.json
-rw-r--r-- 1 root root 248 Feb 22 12:56 openu2f_unregister.json
-rw-r--r-- 1 root root 1013 Feb 22 12:56 pki.json
-rw-r--r-- 1 root root 331 Feb 22 12:56 pki_create_cert.json
-rw-r--r-- 1 root root 868 Feb 22 12:56 pki_find_cert.json
-rw-r--r-- 1 root root 450 Feb 22 12:56 pki_remove_cert.json
-rw-r--r-- 1 root root 314 Feb 22 12:56 pki_renew_cert.json
```

```
-rw-r--r-- 1 root root 4.0K Feb 22 12:56 spankey.json
-rw-r--r-- 1 root root 4.4K Feb 22 12:56 spankey_register.json
-rw-r--r-- 1 root root 977 Feb 22 12:56 spankey_unregister.json
-rw-r--r-- 1 root root 916 Feb 22 12:56 support.json
-rw-r--r-- 1 root root 3.0K Feb 22 12:56 tiqr.json
-rw-r--r-- 1 root root 1.5K Feb 22 12:56 tiqr_download.json
-rw-r--r-- 1 root root 1.5K Feb 22 12:56 tiqr_logintest.json
-rw-r--r-- 1 root root 1.9K Feb 22 12:56 tiqr_register.json
-rw-r--r-- 1 root root 436 Feb 22 12:56 tiqr_unblock.json
-rw-r--r-- 1 root root 614 Feb 22 12:56 tiqr_unregister.json
-bash-4.2#
```

For example, to translate or modify the sentence `Logout`, edit the following file

`/opt/webadm/webapps/selfdesk/lang/common.json` like below.

```
-bash-4.2# vi /opt/webadm/webapps/selfdesk/lang/common.json
{
  "Home": {
    "FR": "Accueil",
    "DE": "Willkommen"
  },
  "Logout": {
    "FR": "Déconnexion",
    "DE": "Ausloggen"
  },
  ...
```

Add a new language, for example `DE`, then modify `languages="FR,DE"` to the following file

`/opt/webadm/webapps/selfdesk/selfdesk.xml` just like below.

```
-bash-4.2# vi /opt/webadm/webapps/selfdesk/selfdesk.xml
<?xml version="1.0" encoding="UTF-8" ?>

<!-- YOU SHOULD NOT NEED TO MODIFY THIS FILE -->

<WebApp name="SelfDesk"
  icon="selfdesk.png"
  version="1.1.8-1"
  wapi="51"
  section="Self-Service"
  license="freeware"
  languages="FR,DE"
  desc="User Self-Service Desk"
  help="Use this Web application to edit your account details, reset password, manage OTP tokens or
FIDO devices...">
...
```

2.5 User Self-Registration (SelfReg)

Log into the WebADM GUI, under **Applications**, choose User Self-Registration (SelfReg) and click on **CONFIGURE**.

The screenshot displays the WebADM Freeware Edition v1.6.9-3 interface. The left sidebar shows the LDAP Server (OpenLDAP) configuration tree with nodes for OpenLDAP (2), dc=WebADM, o=Root (3), cn=admin, cn=ppolicy, and cn=test_user. The main content area is titled 'Registered Applications and Services' and lists three web applications under the 'Self-Service' category:

- Secure Password Reset (PwReset) v1.0.12-1 (Freeware)**: Use this Web application to securely reset your LDAP or Domain password when it is lost or expired. Latest Version: 1.0.12-1 (Ok). Status: Enabled [CONFIGURE] [REMOVE]. Available Languages: FR,DE. WebApp URL: https://192.168.3.163/webapps/pwreset/
- User Self-Service Desk (SelfDesk) v1.1.8-1 (Freeware)**: Use this Web application to edit your account details, reset password, manage OTP tokens or FIDO devices... Latest Version: 1.1.8-1 (Ok). Status: Enabled [CONFIGURE] [REMOVE]. Available Languages: FR,DE. WebApp URL: https://192.168.3.163/webapps/selfdesk/
- User Self-Registration (SelfReg) v1.1.8 (Freeware)**: Use this Web application to self-register your OTP token or FIDO device after receiving a one-time email or SMS. Latest Version: 1.1.8 (Ok). Status: Enabled [CONFIGURE] [REMOVE]. Available Languages: FR,DE. WebApp URL: https://192.168.3.163/webapps/selfreg/

Under **Email & SMS Settings**, one can change the **Email Subject**. Under **Message Templates** to find the other message templates for User Self-Registration (SelfReg). Here, the English message templates can be modified.

-rw-r--r-- 1 root root 3.8K Feb 22 12:56 spankey.json
-rw-r--r-- 1 root root 4.5K Feb 22 12:56 spankey_register.json
-rw-r--r-- 1 root root 890 Feb 22 12:56 spankey_unregister.json
-rw-r--r-- 1 root root 3.1K Feb 22 12:56 tiqr.json
-rw-r--r-- 1 root root 1.5K Feb 22 12:56 tiqr_download.json
-rw-r--r-- 1 root root 1.2K Feb 22 12:56 tiqr_logintest.json
-rw-r--r-- 1 root root 1.9K Feb 22 12:56 tiqr_register.json
-rw-r--r-- 1 root root 436 Feb 22 12:56 tiqr_unblock.json
-rw-r--r-- 1 root root 614 Feb 22 12:56 tiqr_unregister.json
```

For example, to translate or modify the sentence `One-time access ID is invalid`, edit the following file `/opt/webadm/webapps/selfreg/lang/common.json` like below.

```
-bash-4.2# vi /opt/webadm/webapps/selfreg/lang/common.json
{
  "One-time access ID not provided": {
    "FR": "ID unique non fourni",
    "DE": "Einmalige Zugangs-ID nicht angegeben"
  },
  "One-time access ID is invalid": {
    "FR": "ID unique invalide",
    "DE": "Einmalige Zugriffs-ID ist ungültig"
  },
  ...
}
```

Add a new language, for example `DE`, then modify `languages="FR,DE"` to the following file `/opt/webadm/webapps/selfreg/selfreg.xml` just like below.

```
-bash-4.2# vi /opt/webadm/webapps/selfreg/selfreg.xml
<?xml version="1.0" encoding="UTF-8" ?>

<!-- YOU SHOULD NOT NEED TO MODIFY THIS FILE -->

<WebApp name="SelfReg"
  icon="selfreg.png"
  version="1.1.8"
  wapi="49" eapi="1"
  admcss="style.css"
  section="Self-Service"
  license="freeware"
  languages="FR,DE"
  desc="User Self-Registration"
  help="Use this Web application to self-register your OTP token or FIDO device after receiving a one-time email or SMS.">
  ...

```

2.6 OpenID & SAML Provider (OpenID)

If you want to add or modify another language then have a look at the following folder `/opt/webadm/webapps/openid/lang/`.

```
-bash-4.2# ls -lha /opt/webadm/webapps/openid/lang/  
total 68K  
drwxr-xr-x 2 root root 322 Feb 26 17:18 .  
drwxr-xr-x 8 root root 197 Feb 26 17:23 ..  
-rw-r--r-- 1 root root 1.5K Feb 22 12:54 appsso.json  
-rw-r--r-- 1 root root 8.7K Feb 22 12:54 common.json  
-rw-r--r-- 1 root root 340 Feb 22 12:54 edit_enabled.json  
-rw-r--r-- 1 root root 443 Feb 22 12:54 edit_simplereg.json  
-rw-r--r-- 1 root root 463 Feb 22 12:54 edit_timeout.json  
-rw-r--r-- 1 root root 2.2K Feb 22 12:54 home.json  
-rw-r--r-- 1 root root 21 Feb 22 12:54 index.json  
-rw-r--r-- 1 root root 1.2K Feb 22 12:54 login_pki.json  
-rw-r--r-- 1 root root 20 Feb 22 12:54 login_sso.json  
-rw-r--r-- 1 root root 149 Feb 22 12:54 logout.json  
-rw-r--r-- 1 root root 615 Feb 22 12:54 openotp.json  
-rw-r--r-- 1 root root 1.2K Feb 22 12:54 tiqr.json  
-rw-r--r-- 1 root root 20 Feb 22 12:54 tiqr_check.json  
-rw-r--r-- 1 root root 832 Feb 22 12:54 tiqr_offline.json  
-rw-r--r-- 1 root root 818 Feb 22 12:54 trust.json  
-bash-4.2#
```

For example, to translate or modify the sentence `Server error`, edit the following file

`/opt/webadm/webapps/openid/lang/common.json` like below.

```
-bash-4.2# vi /opt/webadm/webapps/openid/lang/common.json  
{  
  "OpenOTP is not installed or configured": {  
    "FR": "OpenOTP n'est pas installé ou configuré",  
    "DE": "OpenOTP ist nicht installiert oder konfiguriert"  
  },  
  "Server error": {  
    "FR": "Erreur du serveur",  
    "DE": "Serverfehler"  
  },  
  ...  
}
```

Add a new language, for example `DE`, then modify `languages = "FR, DE"` to the following file

`/opt/webadm/webapps/openid/openid.xml` just like below.

```
-bash-4.2# vi /opt/webadm/webapps/openid/openid.xml
<?xml version="1.0" encoding="UTF-8" ?>

<!-- YOU SHOULD NOT NEED TO MODIFY THIS FILE -->

<WebApp name="OpenID"
  version="1.3.0-1"
  wapi="50"
  section="Single Sign-On"
  license="freeware"
  languages="FR,DE"
  icon="openid.png"
  desc="OpenID & SAML Provider"
  help="OpenID & SAML single sign-on service (Identity Provider), supporting SAML2, OpenID-
Connect and OAuth2.">
...
```

2.7 Localized Messages

To get an overview of all the message templates go to [Databases](#) and click on [Localized Messages](#).

The screenshot displays the WebADM Freeware Edition v1.7.0 interface. The left sidebar shows the LDAP Server (OpenLDAP) configuration tree with nodes for 'dc=WebADM' and 'o=Root (3)', including users like 'cn=admin', 'cn=ppolicy', and 'cn=test_user'. The top navigation bar includes 'Home', 'Admin', 'Create', 'Search', 'Import', 'Databases', 'Statistics', 'Applications', 'About', and 'Logout'. The main content area is titled 'Database SQL Tables' and is divided into two sections: 'SQL Log Tables' and 'SQL Data Tables'. The 'SQL Log Tables' section lists: Administrator Logs (Admin Portal logs), Manager Logs (Manager Interface logs), WebApp Logs (Web Application logs), WebSrv Logs (Web Service logs), Device Logs (Access Device logs), and Alert Logs (System Alerts). The 'SQL Data Tables' section lists: Localized Messages (Message translations), Inventoried Devices (OpenOTP hardware tokens), Recorded Sessions (SpanKey session recordings), and Client Certificates (Provides revocation).

Message templates for other languages can be added here. One can export/import as/from a CSV file. Click on [Import from CSV file](#).

The screenshot displays the 'Database Viewer for Localized Messages' interface. The left sidebar and top navigation bar are consistent with the previous screenshot. The main content area shows a 'Message Selection' panel with dropdown menus for 'Application' (set to ALL), 'Reference' (set to ALL), and 'Language' (set to ALL). To the right is a 'Message Actions' panel with buttons for 'Update selected messages', 'Delete selected messages', 'Import from CSV file', and 'Export as CSV / XML'. Below these panels is a table with columns for 'Application', 'Reference', 'Language', and 'Message'. The table contains one entry: Application: WebADM, Reference: ResetSubject, Language: FR, and Message: (empty). An 'Add' button is next to the message field. At the bottom, there is an 'Update Selected Messages' button.

The translation files for OpenOTP are located in the `/opt/webadm/websrvs/openotp/doc/languages/` folder and for SpanKey in the `/opt/webadm/websrvs/spankey/doc/languages/` folder.

```

-bash-4.2# ls -lha /opt/webadm/websrvs/openotp/doc/languages/
total 12K
drwxr-xr-x 2 root root 50 Mar 1 11:01 .
drwxr-xr-x 5 root root 4.0K Mar 1 11:01 ..
-rw-r--r-- 1 root root 1.8K Mar 1 11:01 OpenOTP-DE.csv
-rw-r--r-- 1 root root 1.6K Mar 1 11:01 OpenOTP-FR.csv
-bash-4.2# ls -lha /opt/webadm/websrvs/spankey/doc/languages/
total 8.0K
drwxr-xr-x 2 root root 50 Mar 1 11:01 .
drwxr-xr-x 3 root root 85 Mar 1 11:01 ..
-rw-r--r-- 1 root root 1.2K Mar 1 11:01 SpanKey-DE.csv
-rw-r--r-- 1 root root 1.2K Mar 1 11:01 SpanKey-FR.csv
-bash-4.2#

```

Localized Messages CSV Import

Import File:

A localized messages import file must formatted like below:

1. The first line must contain the field names corresponding to the values under the same column in the following lines.
2. All fields and values must be separated with commas (CSV).

LDAP Server (OpenLDAP)

OpenLDAP (2)

- dc=WebADM
- o=Root (3)
 - cn=admin
 - cn=ppolicy
 - cn=test_user

Per default, only the languages “EN”, “FR”, “DE”, “ES”, “IT”, “FI” are available. However, one can add more by adding it to `/opt/webadm/conf/webadm.conf`. For example, “LU” for luxembourgish. Afterward, restart WebADM with `/opt/webadm/bin/webadm restart`.

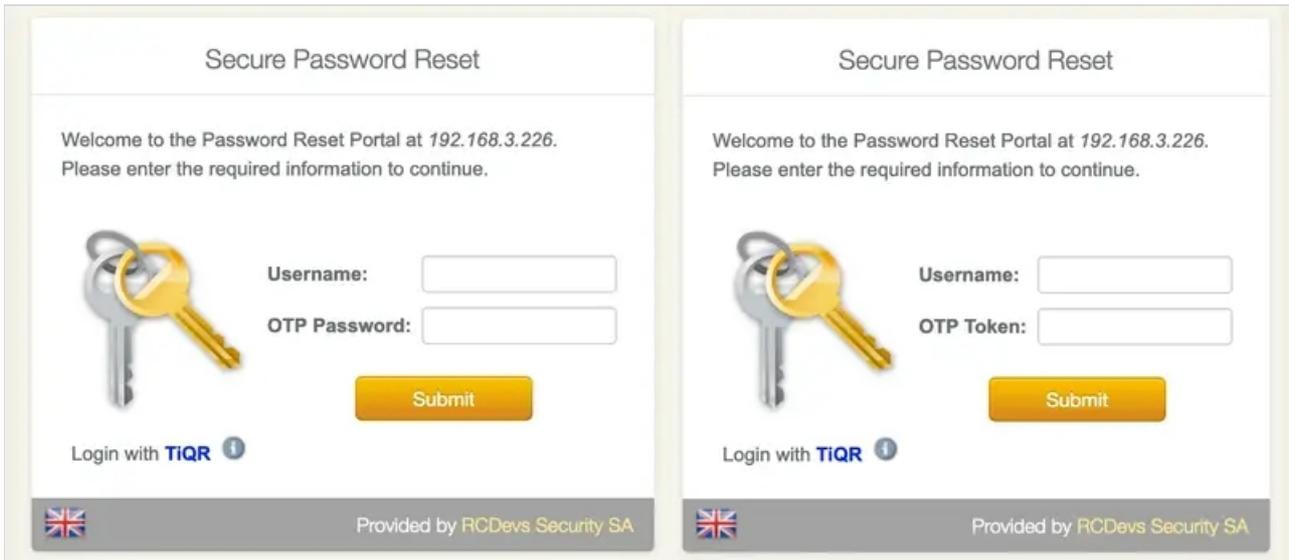

```
-bash-4.2# vi /opt/webadm/conf/webadm.conf
#
# WebADM Server Configuration
#
...
# Application languages
languages "EN","FR","DE","ES","IT","FI","LU"
...
```

2.8 Custom Messages

To modify any English or other language message templates.

For example: To change the “OTP Password:” to “OTP Token:” in the Secure Password Reset log in webpage.

First, create the `custom.json` file, modify it like below and save it.

```
-bash-4.2# cp /opt/webadm/webapps/pwreset/lang/openotp.json
/opt/webadm/webapps/pwreset/lang/custom.json
-bash-4.2# vi /opt/webadm/webapps/pwreset/lang/custom.json"
{
"OTP Password:": {
"EN": "OTP Token:",
"FR": "OTP Token:",
"DE": "OTP Token:"
}
}
```

Afterward, clear the WebADM System Caches [WebADM GUI > Admin > Clear WebADM System Caches](#).
